

Kik App

Kik Messenger, commonly called Kik, is a freeware instant messaging mobile app from the Canadian company Kik Interactive. A main attraction of Kik that differentiates it from other messaging apps is its anonymity, such as allowing users to register without providing a telephone number.

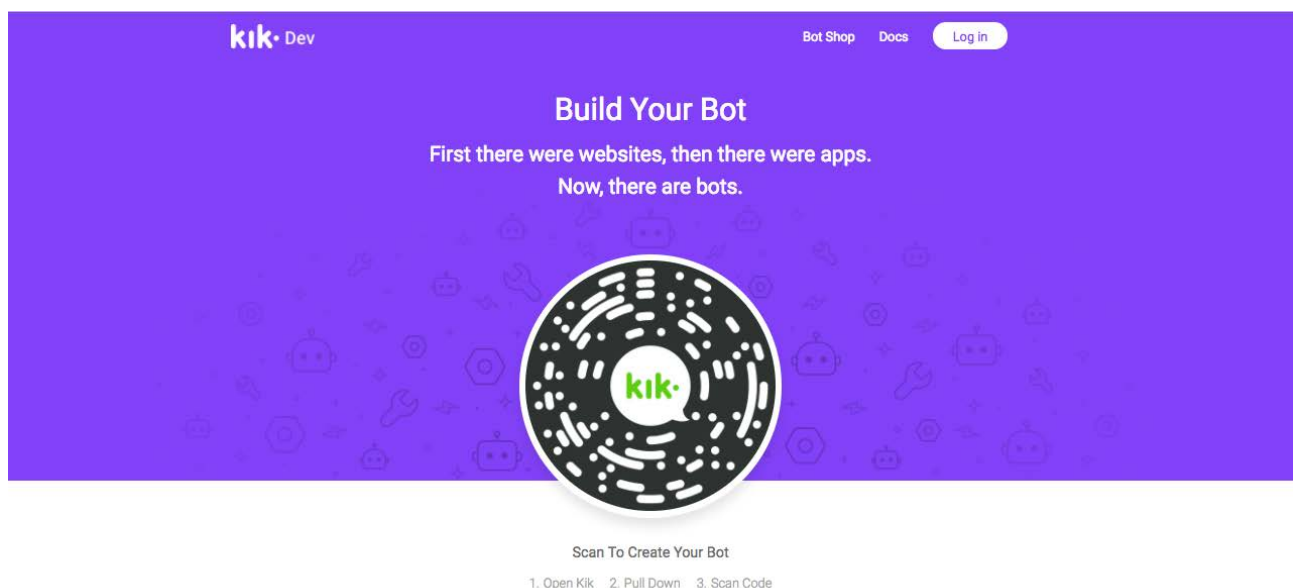

Follow the below steps:

01

If you don't already have a Kik account, you'll need to download the Kik app from either the iTunes Store (<https://itunes.apple.com/in/app/kik/id357218860?mt=8>) or the Google Play Store (<https://play.google.com/store/apps/details?id=kik.android&hl=en>) and create a Kik account.

02

Once you've created your account, go to kik's website (<https://dev.kik.com/#/home>) and Scan code shown on website. (For more instructions on how to scan the code, select "3. Scan Code" from the "Build Your Bot" page shown on website.)

03

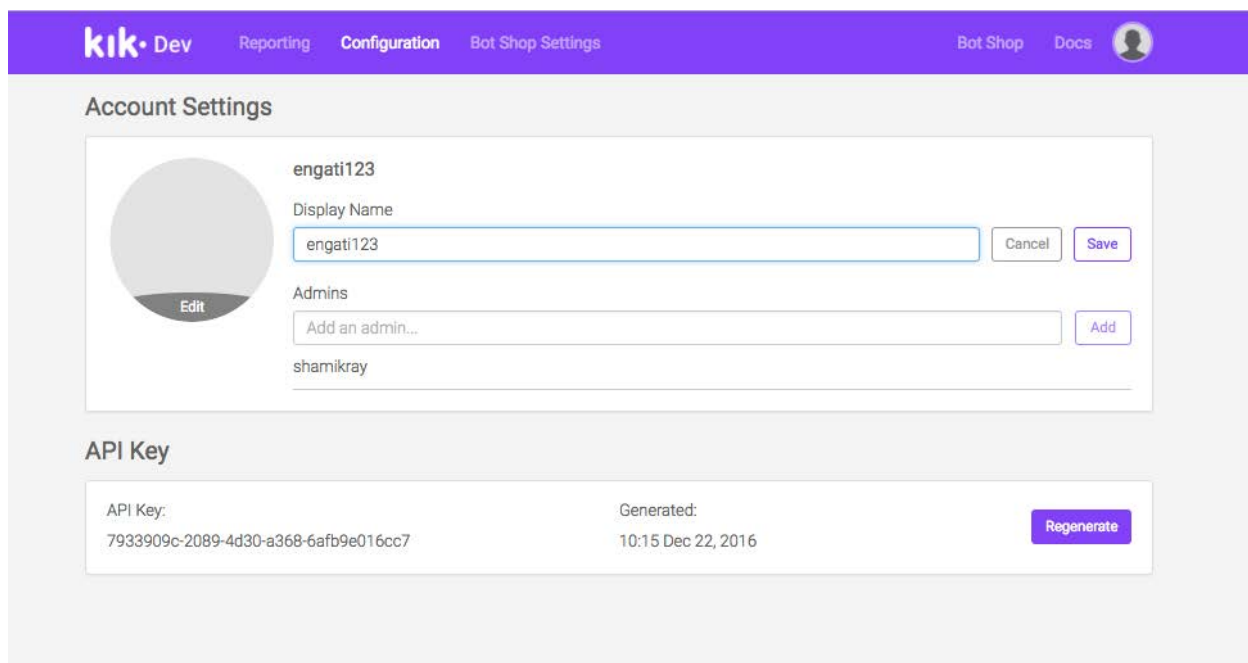

Once the code is scanned, you will begin chatting with kik's bot named "Botsworth" (Botsworth is the one who responds to all your queries or chats with you) on your Kik app. You must create a bot name (the name that you would like to associate with your bot), when Botsworth will ask "What would you like your bot's username to be?", just type in a name and if it's available, then you'll be asked to confirm that the name is correct. Once you have done that, you have created your Kik bot!

04

Now, you will be asked to login to the Bot Dashboard (<https://dev.kik.com/#/login>) and you will need to accept the "Terms of Service" on the Kik website and then you will be taken to your Bot Dashboard.

05

Once logged into your Bot Dashboard, click on "Configuration" and make note of "USER NAME" and "API KEY".

The screenshot shows the 'kik· Dev' dashboard with a purple header. The 'Configuration' tab is active. Under 'Account Settings', there is a profile picture placeholder with an 'Edit' button. The 'Display Name' field contains 'engati123' with 'Cancel' and 'Save' buttons. The 'Admins' section has an 'Add an admin...' field with an 'Add' button and a list containing 'shamikray'. The 'API Key' section shows the key '7933909c-2089-4d30-a368-6afb9e016cc7' and the generation time '10:15 Dec 22, 2016', with a 'Regenerate' button.

06

Now, go back to "Engati- Portal". Under "Channels", fill in the "USER NAME" and "API KEY" AND Click on "Save" button to save your username and your API keys filled.

Your Bot is LIVE and available to everyone!
