

Slack App

A cloud-based set of team collaboration tools and services, Slack brings all your communication together in one place. It's real-time messaging, archiving and search for modern teams.

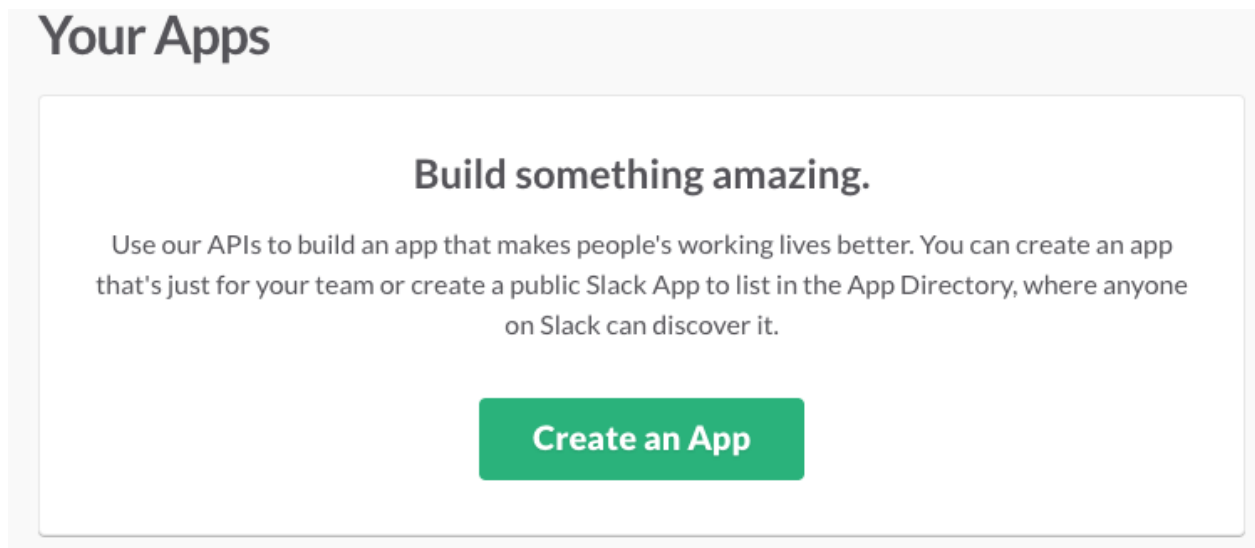

Follow the below steps:

01

Click on the URL (<https://api.slack.com/apps>) to log in to Slack and create a new App.

02

You are now redirected to Slack API. Click on "Create New App".

Your Apps

Build something amazing.

Use our APIs to build an app that makes people's working lives better. You can create an app that's just for your team or create a public Slack App to list in the App Directory, where anyone on Slack can discover it.

Create an App

03

Choose an App Name (for e.g. Engati_Demo).

04

If you are already a part of Slack Team, it will be shown in the drop-down list of "Development Slack Team" (or) If you are not a part of any Slack Team, create or join a Slack Team using this URL - <https://slack.com/>

Create an App ✕

App Name

ENGATI_DEMO

Don't worry; you'll be able to change this later.

Development Slack Team

Service.

Cancel **Create App**

05

Once a new App is created, a Client ID and Client secret is generated UNDER Basic Information.

App Credentials

These credentials allow your app to access the Slack API. They are secret. Please don't share your app credentials with anyone, include them in public code repositories, or store them in insecure ways.

Client ID

Client Secret

You'll need to send this secret along with your client ID when making your [oauth.access](#) request.

06

Choose "OAuth & Permissions" and enter the Redirect URL from Engati-Portal and Save Changes.

ENGATI_DEMO

OAuth & Permissions

OAuth Tokens & Redirect URLs

These [OAuth Tokens](#) will be automatically generated when you finish connecting the app to your team. You'll use these tokens to authenticate your app.

Redirect URLs

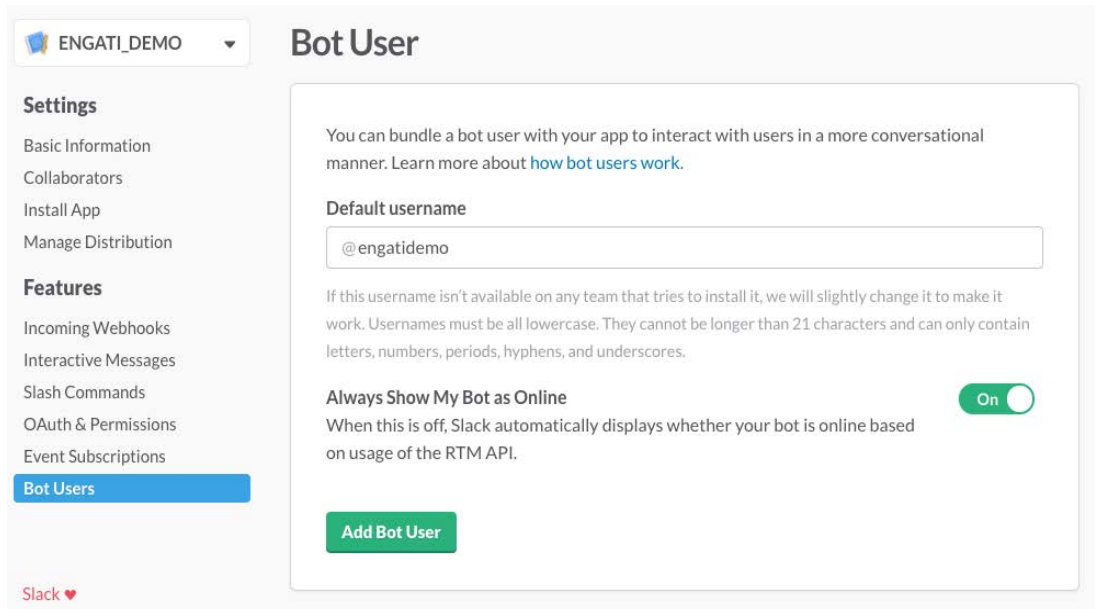

You will need to configure [redirect URLs](#) before you distribute your app.

Redirect URLs

<https://dev.engati.com/slack/oauth/XXXXXXX>

07

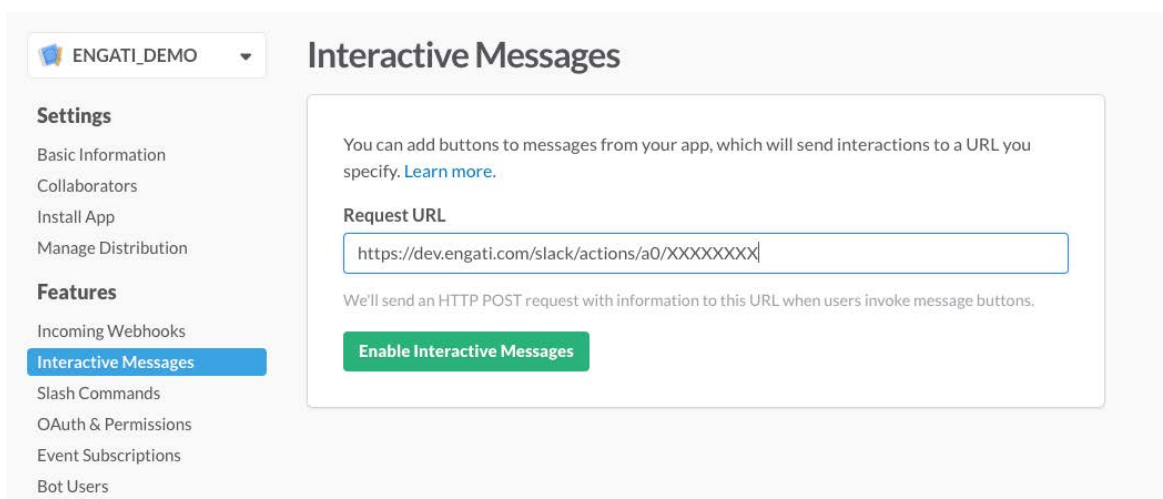

Choose "Bot Users" and click on "Add a Bot User" and you will see your bot username. Enable "Always Show My Bot as Online" and Now, click on "Add Bot User" and Save Changes.

The screenshot shows the Slack Bot User configuration interface. On the left, a sidebar lists settings categories: Settings (Basic Information, Collaborators, Install App, Manage Distribution), Features (Incoming Webhooks, Interactive Messages, Slash Commands, OAuth & Permissions, Event Subscriptions), and Bot Users (highlighted in blue). The main content area is titled "Bot User" and contains a description, a "Default username" input field with the value "@engatidemo", a paragraph explaining username rules, an "Always Show My Bot as Online" toggle switch which is turned "On", and a green "Add Bot User" button. A "Slack" logo with a heart is visible in the bottom left corner.

08

Choose "Interactive Messages" and click on "Enable Interactive Messages". Now, enter the Request URL from Engati-Portal and click on "Enable Interactive Messages" and Save Changes.

The screenshot shows the Slack Interactive Messages configuration interface. The left sidebar is similar to the previous screenshot, but "Interactive Messages" is highlighted in blue. The main content area is titled "Interactive Messages" and contains a description, a "Request URL" input field with the value "https://dev.engati.com/slack/actions/a0/XXXXXXXXX", a paragraph explaining the request, and a green "Enable Interactive Messages" button.

09

Choose "App Credential" inside "Basic Configuration" and make note of Client ID, Client Secret and Verification Token details.

App Credentials

These credentials allow your app to access the Slack API. They are secret. Please don't share your app credentials with anyone, include them in public code repositories, or store them in insecure ways.

Client ID

Client Secret

You'll need to send this secret along with your client ID when making your [oauth.access](#) request.

Verification Token

For interactive messages and events, use this token to verify that requests are actually coming from Slack. Slash commands and interactive messages will both use this verification token.

10

Now, go back to "Engati- Portal". Under "Channels", fill in the Client ID, Client Secret and Verification Token details.

11

Click on "Save" button and save client ID and verification token details.

12

Test your Bot, and you'll get the response in Slack you wanted.!
